

BASIC EDUCATION QUALITY ASSURANCE DEPARTMENT

Po.Box.1382 KIGALI

**REPORT ON INSPECTION FOR SHIFT FROM OLD TO NEW
COMBINATIONS AND TRADES**

From 10-24th February 2022

1. Background

The Presidential Order No 121/01 of 15/10/2020 establishing the National Examination and School Inspection Authority (NESA) gives it a mandate of ensuring the quality of education in Basic Education (BE), and Technical and Vocational Education and Training (TVET), and to regulate the comprehensive assessments of students and national examinations. NESA has the responsibilities of setting standards for accreditation of public, private Basic Education and TVET schools and monitoring the implementation of norms and standards in public, Government-subsidized, and private schools.

Based on Ministerial Orders No 002/MINEDUC/2021 of 20/10/2021 establishing curricula in general, professional and technical and vocational basic education, the following combinations: BCG, LKK, LFK, LKF, HEG, HEL, and LEG were removed from the list of approved combinations, and in the same way, trades in TVET level three (3) to level five (5) that provide technical, vocational, and professional programs will be based on the economic pillars instead of trades. It is with in regard that, the department of Basic Education and TVET Quality Assurance (BE&TVETQA) planned to conduct the inspection with aim of support the public ,Government Aided and and Private schools that were affected by the above changes in combinations, with agreement to receive ordinary level graduates sponsored by the government in this exercise of shifting from old to new combinations and trades without compromising the quality of the rules and regulations governing the accredited trades or combinations.

2. Objectives

The aim of the inspection activity was to assist the schools to shift from the existing combinations /trades to new combinations /trades .

Specifically the inspection aimed to:

- To assess the availability of learning resources (Curricula, textbooks, and teaching materials/equipment) related to the requested combinations/trades;
- To assess the availability of physical facilities (infrastructures);
- To verify the availability of documentation related to school administration
- To assess the effective functioning of the school evidenced by the availability of adequate human resources (administrative staff, teaching staff) and students.

3. Methodology and outcome

This activity was done in fifteen days starting from 10th - 24th February 2022. Inspectors from BE&TVET Quality Assurance Department . Inspectors were planned to visit 1209 schools including 999 Basic Education schools and 210 TVET schools (each combination or Trade was considered)..17 schools were not inspected due to short time but they were assisted to choose appropriate combinations basing on the existing infrastructure. A checklist of school general inspection was used to collect data, actions were taken on sport,

advice or recommendations were given to schools where necessary and advocacy will be done to the concerned institutions. Other non-inspected schools want to open some new combinations or trade will have to seek accreditation as required and observing all protocols as requested by NESAs.

4. Distribution of visited schools by district

S/N	DISTRICT	Basic Education	TVET	Total
1	GASABO	19	3	21
2	KICUKIRO	21	2	23
3	NYARUGENGE	16	5	21
